

Dear whom it may concern,

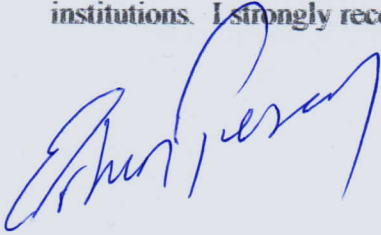

It is my pleasure to recommend Çağrı Kartal for position within your esteemed organization. I have had the privilege of observing Çağrı's growth in three distinct environments over the course of several years.

I first met with him in my Physics lecture. It is a two semester and compulsory course that every freshman took. Then we come across in Manisa Technopolis that, where I conduct my applied research, he was an intern at one of the software firms, despite the fact he is just in the first month of his bachelor at computer engineering. By his third year, he had founded a club called "Konsensus," which fosters interdisciplinary discourse spanning science, art, culture, philosophy, and analytical thinking. I had the pleasure of speaking at one of the club's science panels and was deeply impressed by the collaborative, forward-thinking environment he created.

From these diverse experiences, I can confidently say that Çağrı is a rare blend of intellect, methodical precision, and creative thinking. He consistently demonstrates the ability to synthesize complex theoretical concepts with practical applications. His knack for calculation and decision-making is one of his most valuable qualities: whether it's devising intricate solutions for engineering challenges or strategizing how to grow his student-led club, he applies careful, data-driven reasoning coupled with a keen sense of innovation.

Throughout his academic journey, Çağrı's leadership and collaborative spirit have been evident. In every setting—classroom, research center, or student organization—he proves himself not just as a high achiever but also as someone who elevates those around him. His emphasis on thorough research, strategic planning, and clear communication are indispensable traits for any globally influential institution.

Given his technical proficiency, strategic mindset, and strong ethical foundation, I believe Çağrı is an outstanding candidate for organizations within international scope, such as NATO, the United Nations, or major global corporations. His dedication, adaptability, and problem-solving acumen will undoubtedly contribute to addressing the complex challenges faced by such institutions. I strongly recommend Çağrı for the position in your organisation.

Yours sincerely,
Prof. Dr. Erhan Pesen

Dear whom it may concern,

I am writing this letter to wholeheartedly recommend Çağrı Kartal for a position within your esteemed organization. I have had a friendship with Çağrı since 2021. He was my intern at Meşe Bilişim. When I met him, he was at the beginning of his career, the first year of his undergraduate studies. Over the years, we have maintained close contact, allowing me to witness his continuous growth and steadfast dedication to becoming a proficient computer engineer.

During the period we worked together and afterward, Çağrı continuously improved himself to become a Computer Engineer. I had the opportunity to closely observe the development of his projects and work overtime. In each of his endeavors, he maintains the same excitement to do better and codes details that are undreamed of, which truly surprises me. His planning, vision, and thinking outside the box are one of a kind. Together, allows him to do meticulously execution of his works.

Çağrı's technical knowledge and skills are also worthy of praise. He develops practical applications using programming languages such as Python, Flutter, and SQL. He is a fast learner and successful at putting into practice. I am confident that taking Çağrı to a position at your company would be mutually beneficial: Çağrı would gain valuable experience while contributing meaningfully to your ongoing projects. He is a hard-working, responsible individual who thrives on finding a solution to complex tasks and is eager to expand his expertise.

Should you require any additional information or clarification, please do not hesitate to contact me. I wish Çağrı every success in his application and can assure you that he will be an asset to your team.
